Federal Communications Commission  
Office of the Secretary

Chairman Michael K. Powell  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Chairman Powell,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it

occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Amy Luckett

Dear Commissioner Adelstein,

The need for first responders to be able to communicate in times of crisis has never been greater. Nearly two years have passed since the FCC began dealing with the issue of public safety radio interference. We cannot afford to wait any longer. Although there is a solution available, the safety of first responders is continually jeopardized by dangerous interference.

The Consensus Plan is supported by public safety organizations such as the International Association of Fire Chiefs and the International Association of Chiefs of Police because it provides a proactive and comprehensive solution to the hazardous problem of public safety radio interference.

Interference to public safety radios is caused by the mixing of their frequencies in the 800 MHz band with commercial operators such as cell phone companies. The Consensus Plan will separate these mismatched frequencies so that public safety gets their own dedicated portion of spectrum to operate free from interference permanently. The Consensus Plan also provides additional spectrum for public safety, and does all of this at no cost to public safety agencies, the government or the American taxpayer.

Other approaches presented to the FCC are ineffective band-aids that accept interference as a fact of life. At best, they are reactive; at worst, they are dangerous.

Two years is too long. Please listen to the more than 3,000 supporters of this comprehensive solution. Implement the Consensus Plan - our nation and our nation's first responders will be safer because of it.

Sincerely,

roland fitzpatrick
